large space high-end air sterilizing purifier

99.9%

bacteria
killing rate

720m³/h

circulating air
volume

6 stage

effective
filtration stage

0.1um

medical grade
HEPA

99.9%

H1N1
killing rate

100m²

cover area

24H

human-machine
real-time protection

254nm

Ultraviolet lamp
catalysis

6-stage filtration fast and effective to remove virus/ bacteria

nylon prefilter, high iodine carbon filter, medical grade HEPA, TiO₂ photocatalyst filter. effective prevent the spreading of apatter and airosol, to avoid air filter to be the main source of virus

99.9%

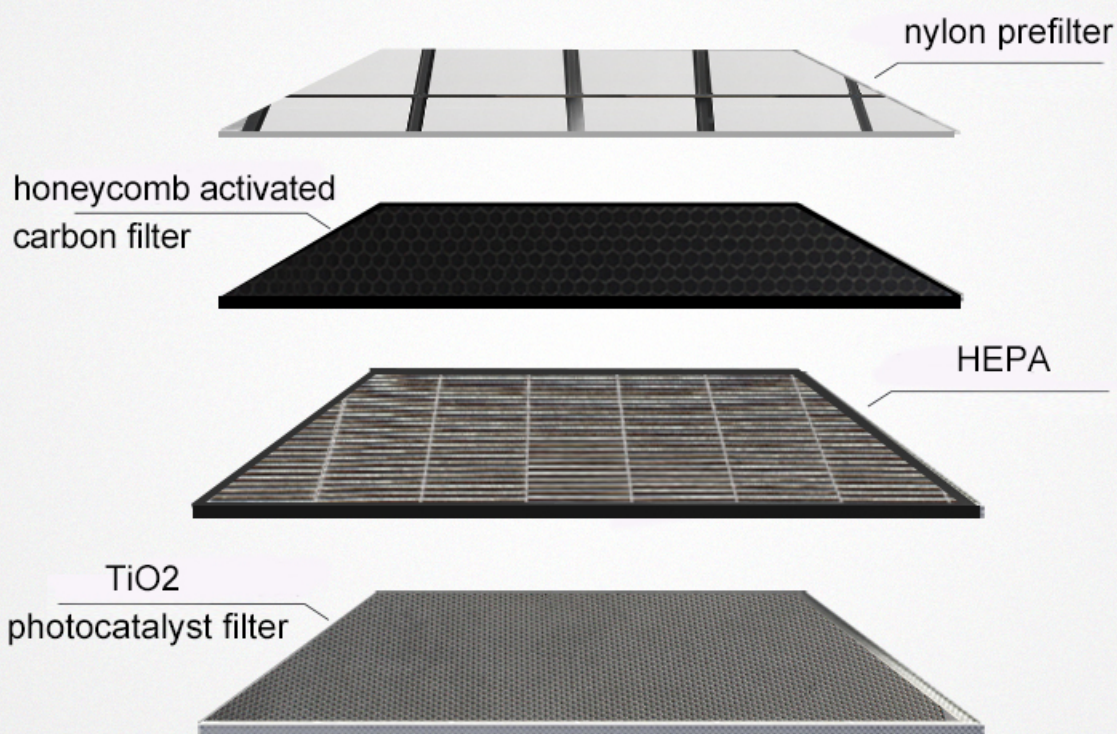

H1N1 killing rate

H13

medical grade HEPA

6 stage

effective filtration stage

UVC lamp constant long-acting killing virus/bacteria

254nm UVC light ,is a good and safe wavelength UV light,can kill vegetative form of bacteria,cov-virus, fungi and the other harmful bacteria and virus,effective preventing their spreading.

HD LED Touch Screen

4 stage air quality indicator light

Specifications

front

back

machine size	490*245*675mm	purify mode	plasma,UVC light
air volume	720m ³ /H	noise	≤70dB
voltage	220V/50HZ	power supply	3 leakage protection
max power	100W	cover area	≤100m ²
shell material	ABS	applicable place	hospital/school/meeting room and the other crowded places
